# About Us

Welcome to my Business by the name of Secure Home Systems.

Let me start by introducing myself My name is Lyndsey Powell and I am very proud of being the Director of the Company, I am also very delighted to announce I have a fully qualified Electrician and Alarms Engineer with over 20+ Years experience within the Company.

SHS is founded on the back of 35 years plus combined industry experience.

After being in the Security Industry for over 17 years we have decided to venture out into a whole new world of Technology, we only use the very latest technology and the most up to date equipment as we strive to be the very best.

Working closely with the Ministry of Defence Installing, Monitoring, and maintaining the weaponry stores and ammunition bunkers, along side some 2000 private homes.

Over the recent years in Cyprus crime has dramatically increased and continues to do so Security is priority and with our latest monitored response units and our award-winning central station there to protect you and your home you are most definitely in very safe hands as we believe prevention is better than cure.

SHS has put all their research and years of experience to adapt to the way the future is changing in technology to make sure you have a smarter home.

We have introduced new technical knowledge and different products and services to enable and to provide the best level of service.

We will work with you to develop and design a package whatever that may be that fits and works around your home, budget and lifestyle. All installation that is carried out is to the very highest of standards, we also offer a like for like service and we will not be beaten on price.

If you would like to see what products and services, we provide all information can be found on our website at [www.shscopyrus.com](http://www.shscopyrus.com) or if you would simply like to chat and arrange a no obligation appointment please do not hesitate to contact us on [26652334](tel:26652334) we are more than happy to help.

We will strive to be the best and hopefully turn your home into a smarter future.

Using the very latest equipment enables us to connect your systems to our fully accredited NSI Gold Central Monitoring Station which provides total piece of mind for you the End User. Please see our Monitoring Section for further detailed information.

# Frequently asked Questions

## Smart Home Devices

### Can I control my devices from abroad?

Sure, any smart devices installed from light switches to electric curtains can be controlled from anywhere in the world.

### Do I need internet?

Yes, you need broadband in your property for the devices to work this can be from any devices and we would be more than happy to arrange this for you with one of our suppliers.

### How do I control these devices?

From any smart phone or tablet no matter how old, android or apple.

### Will my doorbell call my phone if I am not in Cyprus?

Yes, as long as you have data on your phone or an internet connection.

## CCTV

### Can I view my home of business from outside Cyprus?

You can not only live view, but you can play your systems back on your smart phone or tablet at any time.

### Will my cameras work at night?

All our system work at night with the Hikvision dark fighter these systems even remain in colour at night.

## Alarms

### What is Alarm Monitoring

Alarm Monitoring is the link between your property and an Alarm Receiving centre that is permanently manned. Any activation weather a simple power cut to a confirmed Intruder Signal all is being acted accordingly. Unlike basic alarms that just sound outside a monitored system gives a guaranteed response.

### What happens if my property loses power?

If your property were to lose power your monitored response system will not turn off and leave you in a vulnerable situation.

Your alarm system has a backup battery system that will last a minimum of 8 hours so your system will continue to work and protect you normally. However, the central station will inform you that the property has lost power within 30 mins.

### What happens if I set my Alarm off by mistake?

Not a problem one of the 50 plus staff in our control room will call you to assess and request security information and help you reset the system.

## General

### What if my Wi-Fi signal is weak in my home for any of the systems?

We can install Wi-Fi booster or routers throughout your home to expand the range.

# Smart Homes Alexa & Voice Control

## What is an Alexa

These devices come in 2 styles, 1 being audio only or Alexa show with a screen as seen above. These devices allow voice control of any integrated products. Connection to any worldwide Radio station and streaming of any music, Alexa holds over 70 Million songs. Should you require simplicity of Alarm clocks, timers ie for cooking or just general knowledge.

Alexa is also a fully integrated Encyclopaedia.

It may just be a simple weather update you require, Alexa has all the answers.

amazon alexa

# Smart Homes Lighting Switches and Control

Control your TCP Smart lighting products by just using your WiFi. Create the perfect lighting scene in any room with your voice using Amazon Alexa or Google Assistant or simply use the TCP Smart App from anywhere in the world.

Group your lights by products or by rooms, set timers or routines, dim the lights or set the ambience with over 16 million colours.

Smart light Switches can be added to any existing lighting switch. Take control of your lounge, kitchen or even you pool lights from a simple app on your phone or tablet.

Away from home and want to shed a little light on the subject. Simply set a timer or press a button.

*"Alexa, turn off the lights."*

# Smart Homes Sockets & Plugs

Want to turn your hot water on, that's simple.

On your way home and want to boil the kettle that's easy, use your smart plug via the app.

From a simple floor lamp to a heater, the app gives you full control of anything you desire.

Open and close automated gates with ease. Never worry if you have forgotten to turn items off, this is a thing of the past from irons to TV's any item in your home can be made smart.

Let SHS smart homes push you and your property into the future.

# Smart Homes Ring Video Doorbells

Video Doorbells are a way of modern life. These items allow you answer to callers from anywhere in the world. An added benefit is the fact they alert when motion is activated. These units also record all footage to the cloud for future viewing.

# Smart Advanced Monitored Alarm Systems

Risco group are the leading manufacturer of smart security systems. Having worked with some 15 manufacturers over the years it has proven clear that not only are the products reliable and robust but themselves strive to be the market leaders. The functionality and ease of use push Risco to the front foot of the market.

Smart alarm systems allow full control anywhere in the world. Want to let a cleaner in, no problem unset the system from your phone or tablet.

Smart Security Systems are here to protect your home or business night or day. Not only are the systems Pet friendly but are completely wireless so no interruption to your décor or wires running everywhere.

*Protecting over*  
**20 million homes**  
*Worldwide*

## Smart Advanced Monitored Alarm Systems Equipment

WiComm Pro-Smart  
Wireless Security

Control your system remotely  
with the iRISCO App

Enjoy full control of your security, safety, and Smart Home features directly from a single intuitive app, from any location as you go about your day. The iRISCO smartphone app provides you with convenient control on the go for total life management.

## eyeWAVE™ Wireless PIR Camera Detector

The eyeWAVE™ Wireless PIR Camera Detector is a battery powered PIR detector that includes an integrated camera for visual verification and is compatible with the Agility™ 3 security system.

Upon an intrusion event, or by homeowner demand, the camera captures and transmits a sequence of images to the control panel that is then transmitted via GPRS or IP communication to a remote server or to the central monitoring station software.

The images are sent to the homeowner who can view them on a Smartphone using the iRISCO App and/or on the web at [www.riscocloud.com](http://www.riscocloud.com) The visual verification feature enables self-monitoring and also reduces the number of false alarms, increasing peace of mind for the homeowner and saving time and resources for the central monitoring station. All images are stored on the RISCO Cloud server for future analysis if required.

## Wireless Piccolo Pet Friendly PIR

The very latest Motion sensor is The Piccolo PIR is a small and stylish motion detector for residential use. The innovative and clean design is ideal for end users, looking for a contemporary look and feel in their premises.

## Wireless Wristband Panic Transmitter

The Wireless Wristband Panic Transmitter is a water-resistant wristband, designed to be worn like a wristwatch or as a pendant. The panic transmitter can be used for personal emergency situations to signal a panic alarm in the event of distress when the victim is unable to reach another communication device. Ideal for the elderly or disabled- provides peace of mind to both the wearer Live alone, of a good age or just feel Vulnerable or simple health issues.. and their families.

The wrist band panic will connect you straight to our control room and will be able to talk to you wirelessly and get the help you need. At the simple press of a button, we are on hand 24-7 365 days a year. The wrist band panic will also work outside the property to approximately 50 meters.

## Wireless Shock and Contact Detector

The Wireless Shock and Contact Detector combine both a shock detector and a door/ window contact detector in a single casing for internal use. The detector employs an advanced digital microprocessor to analyze the vibration signal

received from the piezo electric sensor. Also includes a reed switch for protection against opening door and windows, and against any attempt to tamper the detector using large magnets.

The detector incorporates an advanced shock detector and a door/window contact on two separate wireless zones. Why settle for a basic door contact that does not detect the removal or breaking of glass.

## Wireless Smoke and Heat Detector

Available now, RISCO Group's Wireless Smoke and Heat Detector combines two advanced technologies within a compact and streamlined design, the ideal choice for homeowners seeking the highest safety standards.

The Smoke and Heat Detector offers a more sensitive and dependable product for early detection of fire hazards in different environments with a reduced risk of false alarms.

## Panda 2-Way Keyfob

The new Panda 2-Way Keyfob is RISCO Group's latest, wireless keyfob, with a contemporary, compact and streamlined design. This keyfob is particularly easy to configure and operate and is compatible with all RISCO Group hybrid and wireless

intrusion systems.

Panda 2-Way wireless Keyfob indicates an acknowledgement status from the panel upon each command via the LED. Going out or simply to bed the keyfob enables simplicity when setting and unsetting your system from the simple press of a button.

## External Wireless Sounder (Rectangular Design)

RISCO Group's stylish two-way wireless rectangular external sounder, RWS53 is designed to extend the signaling capabilities of the security system outside the protected area in any outdoor environment. Being fully battery operated and wireless, the external wireless sounder offers an easy and flexible solution for quick installation.

The sounder includes a pre-alarm feature that begins at entry delay countdown and sends an alarm if RISCO Group's wireless systems are vandalized during entry delay. In this scenario, the siren will activate independently of the control panel.

The sounder also provides squawk notifications when the system is armed or disarmed, including a special 4 squawk notification that indicates that the alarm has been triggered which could signify a break-in.

## External Detection

Why wait for a criminal to enter your home for the systems to activate. Here at SHS in connection with Risco now install full perimeter protection. This enabling the external to set as an independent Alarm System. Should anyone enter the protected area the alarm will activate and inform the Alarm receiving centre of the presence of potential intruders. Well before they gain access to your home. Averting 99% of actual entry saving possessions but more importantly the violation feeling that becomes hard to live with. Not only are the external detection systems wireless but also as addition can have built in cameras that send still images to the Alarm Receiving Centre and your phone when the system activates

## Beyond DT Wireless Outdoor Detector with Camera

Beyond offers one of a kind combination of dual technology and integrated camera, providing crystal clear visual verification capability via the iRISCO smartphone app., web interface or monitoring station. These new features are combined with RISCO's unique detection technologies of Sway Recognition™ and Digital Correlation™ which drastically reduce false alarms in outdoor environments and Provide an ultimate outdoor detection solution.

# What is Monitoring & What Are the Benefits

A Monitored Alarm is the best way to protect your Assets. Assets do not always have to be physical products they can be data Intellectual property too.

A monitored alarm minimises the impact of theft by cutting the time the thieves have as the alarm acts as a deterrent and provides you with peace of mind.

Your Alarm will be monitored 24hrs a day 7 days a week by our trained alarm receiving centre operatives. They are there to assess the situation and decide on the most appropriate response.

You might think the benefits of alarm monitoring does not outweigh the cost in actual fact monitoring is a vital part of any security and health and safety.

If like us, you understand the importance and benefits of having a monitored alarm please do not hesitate to contact us.

## Strategy benefits of alarm monitoring:

- Guaranteed Response
- Peace of mind
- Reduces false alarm activations.
- Protects assets.

Every minute counts in a genuine activation which is where monitored alarms really pays dividends.

A third of homeowners ignore a ringing basic bell alarm with our Monitored alarms it guarantees you the response you require you do not have to depend on a neighbour or a passer by to act on your behalf. Relying on a neighbour or friend is also putting their selves at risk in the true event of confrontational situation.

Monitoring identifies issues in the property well before the owners do, this could be a power cut leading to saving of food in the freezer or for long periods of time a green pool with no filtration. If your property is unoccupied for lengthy periods of time these simple added benefits could potentially be importance.

# High Security Door & Window Locks

If you want to improve your home security, installing high security locks is a sensible place to start. It will strengthen your first line of defence and make it more difficult for anyone to break into your property.

The majority of doors in Cyprus are fitted with standard cylinder locks, but armed with a hammer or screwdriver and no necessary expertise, a burglar can break this type of lock in under 3 minutes. Once they have snapped the cylinder the rest of the lock becomes vulnerable and in very little time they will have gained unauthorised access to your property and the belongings therein.

Standard euro cylinder locks can be directly replaced by anti snap locks very quickly by SHS. If anyone should attempt to snap the lock it will only break at the anti-snap line, leaving the rest of the locking mechanism intact and thus protecting you against forced entry

You might have several locking points or even deadbolts fitted to your door, but the main lock cylinder is the weakest point and once this is compromised your other attempts at home security may be futile

# Digital IP CCTV Systems

Hik Vision is the world leader in CCTV and we are proud to be the supplier and Installer of these products.

CCTV has become a part of daily life. Not only a deterrent but ideal for many applications. Our CCTV system are of the very highest quality using future proof IP digital equipment.

Hik Vision is the world leader in CCTV and we are proud to be the supplier and Installer of these products.

Here in Cyprus, it tends to normality for criminals to turn the power off to properties before they gain entry. With our UPS power supply units, the system will continue to work as normal for up to 8 hours.
